

Chickasaw Blackberry

Rubus sp.

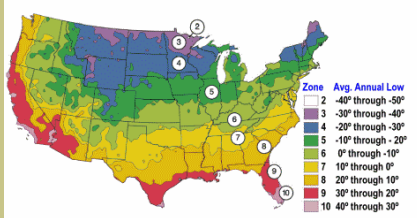

This high yielding variety produces large high quality fruit on vigorous erect canes. The fruit is long, cylindrical, and slightly flattened in shape and very attractive with a glossy, black finish.

Resistant to anthracnose.

Developed by the University of Arkansas.

Ripens: Beginning approximately June 10 at Clarksville, Arkansas, and fruiting extends for five to six weeks.

Cold hardy to U.S.D.A. Zone 6.

Since 1944
