

Earliblue Blueberry

Vaccinium corymbosum ×

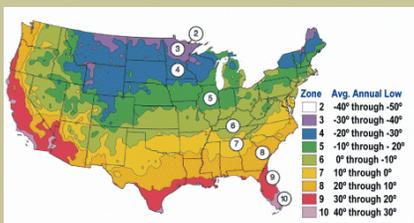

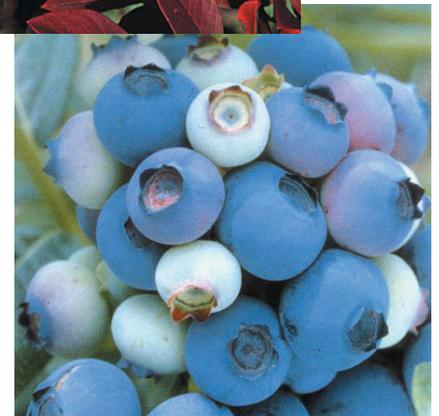

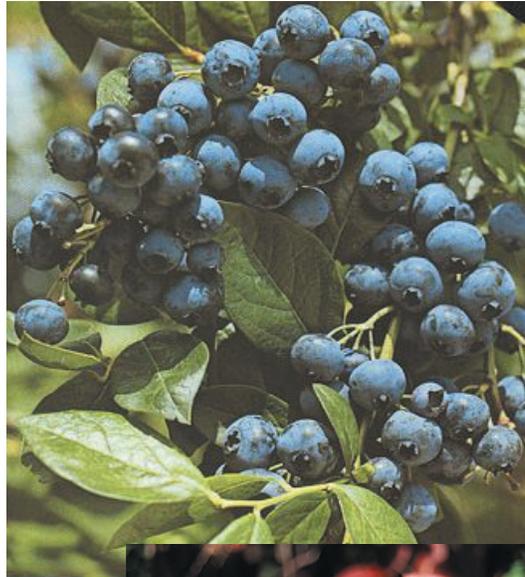

First to ripen. Large, light blue, delicious sweet flavored berries. The upright bush produces stout canes with bright red wood and large glossy green leaves. Plant where blueberries are well suited and avoid frost pockets where early crops might be damaged.

Requires 800 hours of chilling below 45° F.

Ripens: Early part of season

Grows Upright to 5-6 feet.

Cold hardy to U.S.D.A. Zone 5.

Since 1944
