

Early Ruby Cherry

Prunus avium sp.

Large. Dark red skin. Rich purple, very sweet, excellent flavored flesh.

Early bearing, heavy producer in the San Joaquin Valley and all sweet cherry areas.

One of the earliest to produce but holds well on the tree.

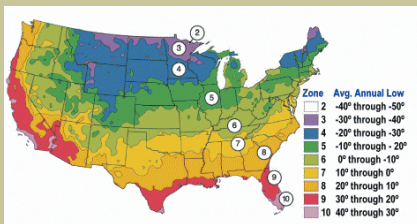

Needs a pollinizer such as Black Tartarian, Van, Royal Ann or Stella.

Requires 600 hours chilling below 45°F.

Ripens: Early Season.

Cold Hardy to U.S.D.A. Zone 6.

Patent No. 4150

Since 1944
