

Celestial Fig

Ficus carica

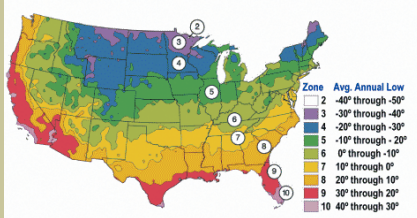

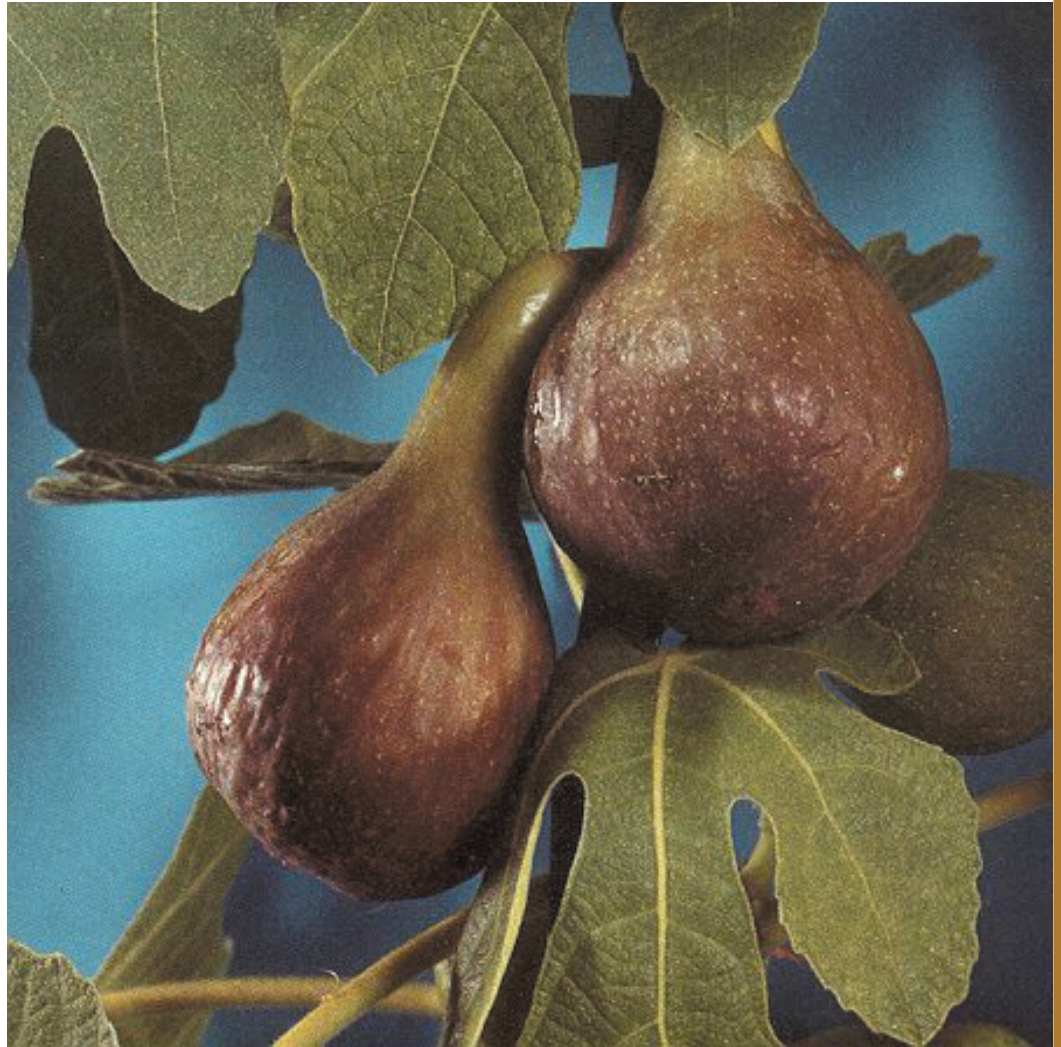

Small to medium. Skin colored violet to purplish-brown. Flesh white, shading to rose at center. Firm, juicy, sweetest of all. Excellent quality. Best to avoid extremes of heat or cold, yet has proven to survive lows of 11 degrees F. in Texas. Likes moderate coastal climates. A regional favorite in Mississippi and Louisiana.

This semi-tropical tree requires negligible chilling hours.

Ripens: Throughout August to nearly frost.

Mature height is 20 feet with a spread of 20-25 feet

Cold Hardy to U.S.D.A. Zone 8.
