

# Lang Jujube

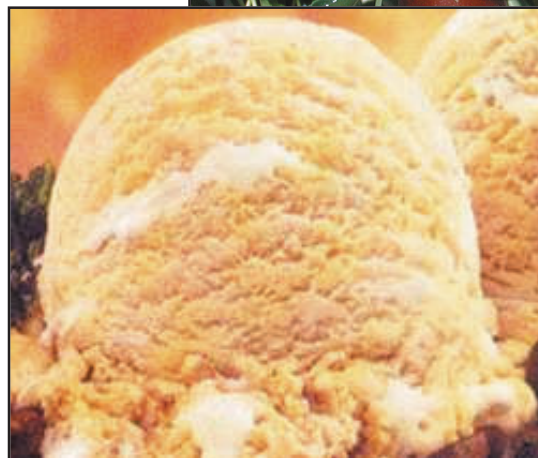

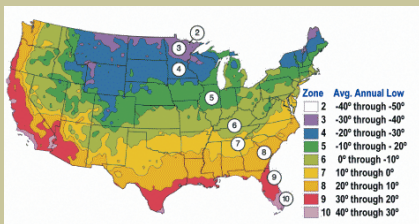

*Ziziphus jujuba*

Shiny reddish-brown, date like fruit. Sweet apple flavor. When candied and dried they resemble dates. Also, a delicious icecream can be made. The fruit is 1½ inches long, distinctly pear shaped. Ripens earlier than Li. Best when picked fully ripe off the tree. Needs hot summer for fruit to ripen. Produces very well in desert areas. Attractive shiny leaves and rugged, picturesque bark.

Ripens mid September

Mature height is 15-30 feet with a spread of 15-20 feet.

Cold hardy to U.S.D.A. Zone 5.
