

# Sherwood Jujube

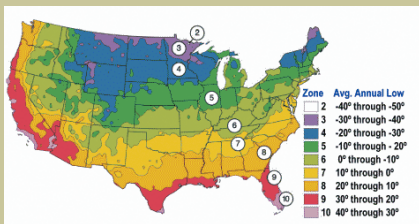

*Ziziphus jujuba*

Excellent tasting, firm large shiny reddish-brown date-like fruit. Sweet apple-like flavor. When candied and dried, resembles date. Good in hot desert areas. Attractive shiny leaves. Upright grower with far fewer thorns than other selections. Not recommended for areas where climate cools before fruit ripens.

Ripens Early to Mid October

Mature height is 15-25 feet with a spread of 12-18 feet.

Cold hardy to U.S.D.A. Zone 5.
