

Desert Willow

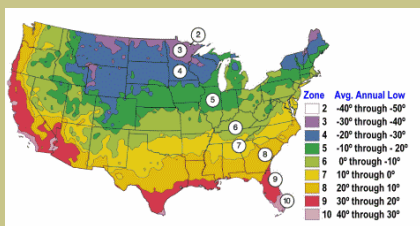

Chilopsis linearis

Delicate appearing tree native to western states. Its long narrow leaves resemble those of willows (*Salix* sp.) but are not related. Flowers occur in showy clusters at the tips of branches and on new wood from late spring to fall. Rose-pink blossoms are trumpet shaped, sweetly fragrant.

Naturally grows as a large bush 15-25 feet tall and wide but can be trained as single stemmed tree.

Drought tolerant.

Cold Hardy to
U.S.D.A. Zone 7.

Since 1944
