

Triloba Flowering Plum

Prunus triloba 'Multiplex'

The flowers are very attractive double pink and white. This shrub is grown for its spring blooms and should be positioned towards the back of a shrub border for an early spring accent. This plant is hardy and suitable for many locations.

Mature height is 10-15 feet with a spread of 10-15 feet.

Cold Hardy to
U.S.D.A. Zone 3.
