

Crystal White[®] Lilac

Syringa vulgaris 'Crystal White'

This is simply the most stunning white lilac we have seen.

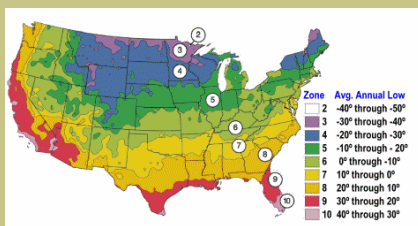

White colored, fragrant, single flowers in large panicles. Long stems perfect for cut flowers. The bush is a prolific bloomer.

Early blooms, and longer display. Blooms about 2 weeks before Edith Cavell and Madame Lemoine and nearly in time with Angel White. Showy display lasts nearly two weeks.

This is a careful selection from *Syringa vulgaris* 'Alba' seedlings.

Mature height is 8-10 feet with a spread of 6-8 feet.

Cold hardy to U.S.D.A. Zone 3.
