

# Horseradish

*Armoracia rusticana*

A large, coarse, weedy looking herb cultivated for its roots for use as a pungent food relish.

**Warning** - Edible in small amounts only. Toxic if large amounts eaten.

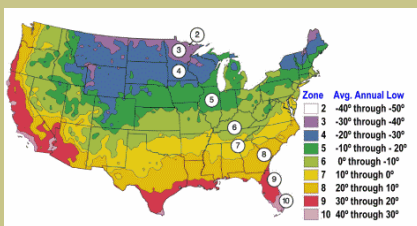

Grows best in rich, moist soils and cool regions but can survive in a wide range of soils and climates.

Plant in late winter or early spring. Roots may be dug in winter or spring and will replenish themselves if a few roots are left in the soil.

Mature height is 3-5 feet.

Cold hardy to U.S.D.A. Zone 2.

Sunset Zones: 2-24, 28-41
