

# Bare Root Planting Guide

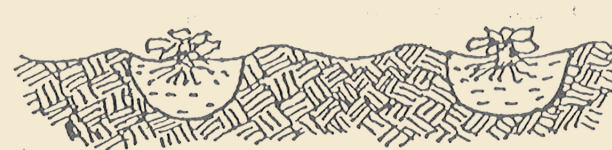

<http://www.lecooke.com>

## Planting Asparagus

1. Dig a trench 10 inches deep.
2. Mix 1 part soil amendment to 3 parts soil.
3. Plant the crown 6 inches below the surface.
4. As the plants start growing, add mixed soil little by little until even with soil surface.

## Planting Strawberries

1. Trim extra long roots.
2. Mix one part soil amendment to 3 parts soil.
3. Set plants so crowns are even with soil.
4. Water in well.

## Planting Artichokes

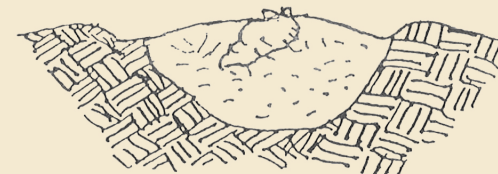

1. Dig a generous hole.
2. Mix 1 part soil amendment with 4 parts soil, add sand if needed.
3. Plant with buds at surface.
4. When growth starts, add mulch.

## Planting Cane Berries

1. Dig planting hole.
2. Mix 1 part soil amendment with 3 parts soil. Add slow release fertilizer.
3. Set plants deep so canes just show.
4. Firm soil and water.

## Planting Rhubarb

1. Dig a wide trench or hole.
2. Mix 1 part soil amendment with 3 parts soil.
3. Set root division high so buds are at surface and are not standing in water.
