

# Natchez Blackberry

*Rubus sp.*

Large, high quality blackberry produced on thornless, erect to semi-erect canes.

It produces larger fruit than Arapaho and Ouachita and excellent yields similar to Ouachita and higher than Arapaho. Stores and handles very well.

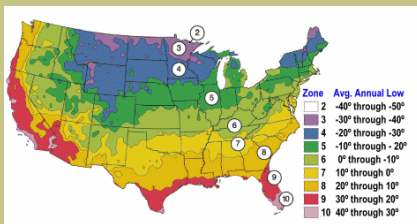

Self Fertile.

Ripens early, 7 days before Ouachita, approximately June 3 in Clarksville, Arkansas.

Cold hardy to U.S.D.A. Zone 6.

Developed at University of Arkansas.

Plant Patent (PPAF)

Since 1944
