

Draper Blueberry

Vaccinium corymbosum ×

Draper has become a standout variety in mid and high chill climates throughout the West. It has a compact habit and is highly productive as a young plant with outstanding quality fruit. Firm berries, long shelf life and excellent post harvest color. Yellow fall color.

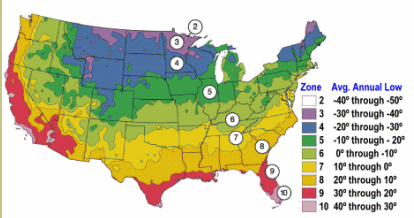

Semi-Self Fertile. Produces better with another variety to cross pollinize.

Ripens: Mid-Season

Requires 800 hours chilling below 45° F

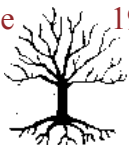

Cold hardy to U.S.D.A. Zone 5.
