

# Duke Blueberry

*Vaccinium corymbosum* sp.

Medium to large light blue berries with a mildly sweet flavor. This attractive berry is quite firm and retains its fresh quality longer than most varieties.

Duke blooms late but ripens early, which protects the blossoms from spring frosts.

It is one of the heaviest, most consistent producers, often yielding over 20 pounds per bush when mature.

Duke bushes are upright growers but the branches will droop to the ground when laden with fruit.

The foliage turns yellow-orange in fall.

Ripens: Early-season

Grows Upright to 5-6 feet.

Cold hardy to  
U.S.D.A. Zone 5.
