

# Jewel Blueberry

*Vaccinium corymbosum* sp.

Jewel has become one of the leading varieties in California due to its site adaptability, exceptional growth, record yields and large quality fruit.

Ripens early to mid season, a few days after Star and lasts for about four weeks.

For more abundant fruit, plant near other mid-season blueberries for best pollination.

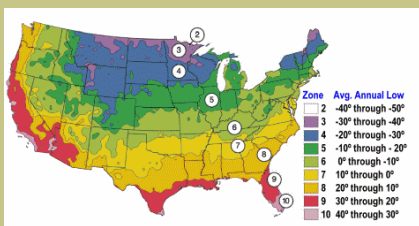

Mature height is 5-6 feet with a spread of 4-5 feet.

Requires 200 hours chilling below 45° F.

Cold hardy to U.S.D.A. Zone 6.

Plant Patent #11,807

Since 1944
