

# Mild Climate Apple Combination

*Malus sp.*

The **Mild Climate Apple Combination** was created for those areas with 400 or less hours of chilling. It will provide you with fresh apples all summer long.

The tree has three to four of the following apple varieties.

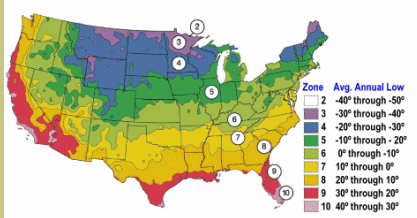

**Anna** will be the first apple to be plucked off the tree. A large light greenish-yellow apple with a slight red blush, with a sweet, slightly tart taste and a crisp, creamy white flesh.

**Dorsett Golden** will be the next apple to come off. A medium to large yellow apple that has an orange-red blush. It has a sweet-tart flavor and crisp white flesh.

**Gordon** is the third apple to ripen. A medium to large apple that is green overlaid with red. It has a sweet-tangy flavor with a juicy, crisp, fine texture white flesh.

**Red Fuji** is the final apple to be picked. A medium sized apple with yellowish green base and a red blush over the entire surface. It has crunchy white juicy flesh with an excellent flavor.

Ripens June thru September  
Cold hardy to U.S.D.A. Zone 5.

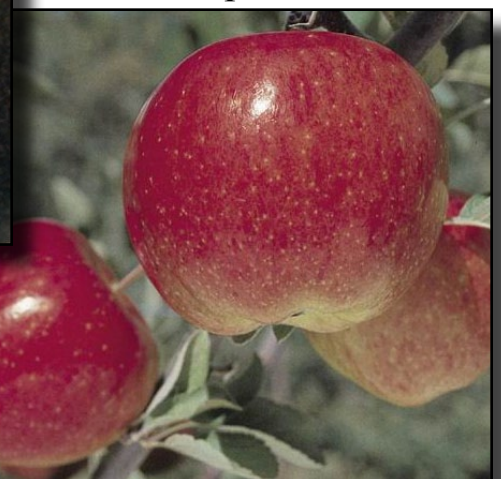

Anna Apple  
Late June

Dorsett Golden Apple  
July

Gordon Apple  
August-September

Red Fuji Apple  
September
