

Li Jujube

Ziziphus jujuba

The #1 Seller. Sweet apple flavor. When candied and dried they resemble dates. Also, can be made into a delicious ice cream.

The fruit is 1½ inches long, round and plump.

Ripens later than Lang. Unlike Lang, can be picked yellow-green and will finish ripening off the tree.

Needs hot summer for fruit to ripen, especially good in desert areas. Attractive shiny leaves and rugged, picturesque bark.

Ripens mid to late September.

Mature height is 15-20 feet with a spread of 15-20 feet.

Cold hardy to U.S.D.A. Zone 5.
