

Stuart Pecan

Carya illinoensis sp.

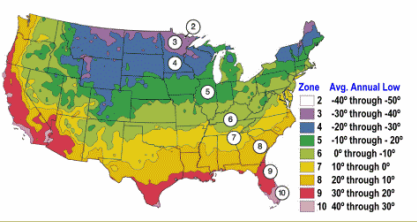

An older variety and formerly the dominant pecan in the U.S. Pecan industry. Large, hard shell. Reliable, highly productive, hardy and fast growing. Scab resistant. Not recommended for the arid West.

Requires pollination with an early pollen shedding variety such as Desirable.

Ripens: Late October

Mature height is 70-100 feet with a spread of 30 feet. Usually kept lower by commercial pruning.

Cold hardy to U.S.D.A. Zone 6.

Commercially pruned pecan orchard

Since 1944
