

Western Schley Pecan

Carya illinoensis sp.

Large, elongated, thin shell, rich flavor kernel. Heavy producer.

Self-fertile but will produce more if pollinized with late pollen shedding variety such as Wichita.,

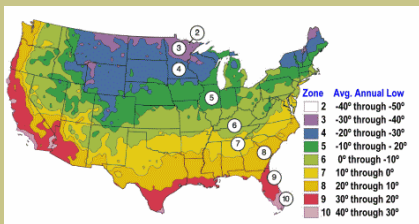

Bears at young age.

Most popular pecan for arid, western climates.

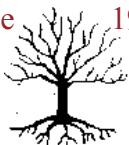

Ripens: November.

Mature height is 70-100 feet with a spread of 30 feet. Usually kept lower by commercial pruning.

Cold hardy to U.S.D.A. Zone 7.

Since 1944
