

# Chaparral Weeping Fruitless Mulberry

*Morus alba 'Chaparral'*

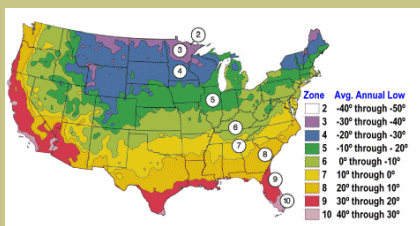

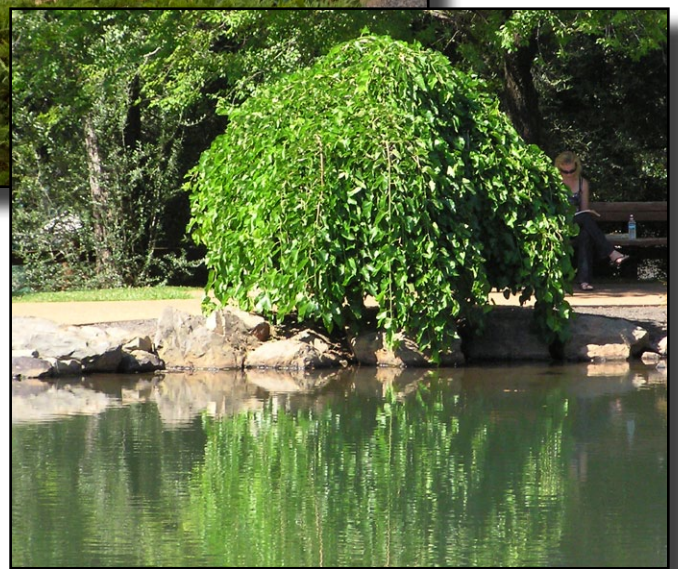

A vigorous, small weeping tree. Its cascading branches are covered with deeply cut, very glossy, dark green leaves. This variety is fruitless.

They will grow nearly everywhere - from the desert providing quick shade to Canada. Tolerates cold, heat and alkaline soil. Resistant to Texas root rot.

Available grafted at three different heights.

Grows to height of 12-15 feet and a spread of 15-20 feet.

Cold Hardy to U.S.D.A. Zone 3.

Since 1944
