

Chaparral Wpg. Fruitless Mulberry

Morus alba 'Chaparral'

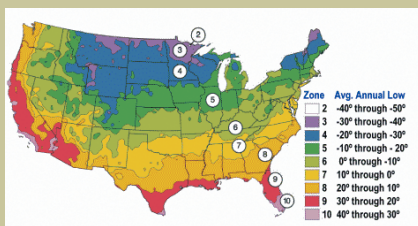

Fruitless variety is much improved over previous weeping mulberries. Deeply cut, very glossy, dark leaves.

They will grow nearly everywhere - from the desert providing quick shade to Canada. They tolerate cold, heat and alkaline soil. They are resistant to Texas root rot.

Available grafted at three different heights.

Grows to height of 12-15 feet and a spread of 15-20 feet.

Cold Hardy to U.S.D.A. Zone 3.

Highlighted Chaparral Mulberry at Disney World - Orlando, FL
