

California Native Sycamore (Roberts)TM

Platanus racemosa 'Roberts'

Native along streams in California foothills and coast ranges. This special selection has attractive features such as superior patchy white/buff-colored bark. Its large leaves are smooth edged and more deeply cut than the California Native. Appears to be **resistant to anthracnose**.

Mature height is 50 feet with a spread of 40 feet.

Cold hardy to
U.S.D.A. Zone 7.

From the nurseries of
L.E. COOKE CO
