

# Ivory Tower<sup>®</sup> Sycamore

*Platanus × acerifolia 'DTR-127'*

Tall, straight and magnificent are words used to describe this stately tree. Trees in the landscape and in the production field show a pleasant propensity to grow straight. Sycamores that lose their terminal buds through foliage diseases such as anthracnose tend to branch and grow a bit ragged. This tree has proven to be very clean foliage in the Visalia environment and it is time to see how it performs in wider geographical areas. Attractive whitish-tan bark.

Height to 50 ft.,  
spread 30-40 ft.  
Cold hardy to U.S.D.A.  
Zone 5.
